

# HIGHLANDER TYPE ONE RULE BOOK

# April 2018 Version 1.8

#### Credits

Highlander: TCG™ and the SwordMaster™ System Created By:	Mike Sager
Highlander Versus Rulebook Written By:	Jim Black and Steven Rice
Web Page:	www.highlandercardgame.weebly.com
Editor and HTML Adaptation	Steven Rice

This rule book supersedes any prior rulings and rule books for Type One formats only and is the only resource needed to play in Type One format tournaments. Any updates to these rules can be found at www.highlanderthegame.com . If you see updates in red, they are in the three week induction period we place on any rules updates. Otherwise, all rules in this document are the most current rulings.

# **Game Concept and Goal of the Game**

Highlander: The Card Game is designed to simulate a duel between two Immortals: yourself and your opponent. During the course of play, both players will play Attacks and Defenses as if they were fighting with swords. Other cards will represent the tricks, tactics, schemes, and plots you utilize to win. It may be helpful to think of the game as a series of encounters with your opponent, through the centuries, rather than a single brief duel. While these rules will give you the basic framework for the game, the cards you play will often let you do things the rules say you cannot.

Your deck of cards is your Endurance. After you have drawn all cards from your Endurance, you Exhaust. Exhaustion means a loss of 5 Ability, but not necessarily the end of the game.

Both players are able to take a certain amount of damage before losing the duel. This amount is known as your Ability.

You start the game with an unmodified maximum ability of 15. If you take damage or are affected by ability loss or gain, your ability will be adjusted during the Ability Adjustment Phase. You may hold as many cards in your Hand as your current ability, unless your Hand Size has been modified. Your Ability not only represents your 'score', but also your luck, skill, and knowledge. As you lose Ability, you will find yourself with fewer cards, and thus, fewer options, in your Hand.

Your goal is to reduce your opponent to an Ability of zero, or cut off your opponent's head via a Head Shot. When a player begins their Attack Phase at zero Ability, their opponent wins the game.

A successful Head Shot will end the game quickly. A Head Shot is a modified upper attack. If your opponent cannot defend against the attack, their head is taken, and the game ends immediately.

# **Card Anatomy**

Let's examine what makes up a Highlander card:

**Card Type Icon:** In the upper left-Hand corner of the card, there will be an icon denoting the card type, unless it's a Pre-Game card.

**Title:** Across the top of the card is the title bar. The title of the card will appear here, in large letters. Your deck may contain only 6 cards of the same title. Note: If there is a diamond symbol next to the title of the card, you may only have one of that specific card in play at a time.

**Sub-Title:** Unless the card is "Generic," you will find the name of a Weapon of Choice, Persona, or Faction (e.g. Clan MacLeod) that categorizes a Persona just beneath the title, in slightly smaller letters. Though the name of a Weapon of Choice, Persona, or Faction (e.g. Clan MacLeod) may appear in the title box, it is not considered part of the title when determining card effects and restrictions. A card is Weapon Specific if it has a Weapon of Choice's name, and Persona Specific if it has a Persona's. Weapon Specific Cards cannot be included in your deck or used during a game unless you are using the proper Weapon of Choice. Only a Persona whose name or Faction name appears in the title box may include that card in their Endurance, unless you are playing with or playing as a Generic Persona (see Generic Persona).

Reserved or Signature Symbol: If a card is Signature or Reserved, there will be a Sword in the

title bar, over to the right Hand side. On a Signature card, the sword will have an "S" attached to it. Reserved cards cannot be included in your deck unless your Persona's name appears in the Sub-Title. Signature cards cannot be included in your deck or played during a game unless your Persona's name or Faction name appears in the Sub-Title. The Restriction number (see Restriction Number) on Signature cards cannot be altered.

Hand Icon: If the card has a small white icon in the shape of a Hand, it depicts something that requires a Hand to be used. A card with a Hand Icon cannot be played if you already have two Hand Icons in play. You can never have more than two Hand Icons among any of the cards you have in play. If you have only one or fewer Hand Icons in play, you are considered to have a free Hand. Many Pre-Game cards, such as Weapon of Choice, have a Hand Icon, and some have two. If at any time you have more Hand Icons in play than you are allowed, you may choose to use an effect to Disarm any weapon you have or remove from play any of your cards with Hand Icons until you have the maximum number of Hand Icons allowed to you in play.

**Restriction Number:** If there is a number to the far right Hand side of the Title bar, that card is restricted. Your Endurance may only contain as many of that card as the Restriction Number.

**Diamond Icon**: If there is a Diamond next to the title of the card, this indicates that you may only have one of that particular card in play at a time.

**Text:** At the bottom of the card, you will find the Card Text also known as Game Text. Here you will find any special instructions about that card. You may also find a sub-category to a card here. It will most likely be found following the type of card on the first line of Text.

# Constructing a Deck

In Type One format you may use cards from 1st Edition produced by TCG, The Raven produced by SAEC Games (except TIME and TRAP cards), 2nd Edition produced by Le Montegard

(except cards that are Bugged

), and 3 rd Edition cards produced by Paradox Printing

(except cards that are Bugged ) to create your deck. This gives all kinds of directions that you can go on building your deck with innovative and original ideas. If your deck includes cards with different colored borders, then you must play your cards in opaque card sleeves so that the backs of the cards cannot be seen. **Minimum Deck Size:** The minimum deck size is 50 cards, unless you have a card or effect that allows you to lower the minimum deck size.

#### **Version Rule**

**Mixing the cards from different Editions**: When a card (Pre-game or In-game) shares the same title, grid, and text as a card from another edition of the game, you must choose which version you wish to include in your deck. You may not mix versions of the card chosen when constructing your deck. To ensure you are not accidentally mixing versions, confirm the errata section concerning the cards you have chosen, or confirm with your tournament director.

**Attacks**: Attacks have a red grid icon. One or more of the squares in the grid is filled with a red square. Those red squares show where the Attack is aimed. You are required to include at least one each of the nine Basic Attacks in your deck. They are: Upper Left Attack, Upper Center Attack, Upper Right Attack, Middle Left Attack,

Thrust, Middle Right Attack, Lower Left Attack, Lower Center Attack, and Lower Right Attack.

**Special Attacks**: Special Attacks have a gold grid icon, and are often more difficult to defend than normal Attacks. Edge cards can be played in conjunction with Special

Attacks.

**Blocks**: Blocks are Defenses with a blue grid icon. If you have a block that covers all areas of an Attack played against you, you can play that block to block the Attack. You are required to include at least one each of the six Basic Blocks in your deck. They

are: Upper Left Block, Upper Center Block, Upper Right Block, Lower Left Block, Lower Center Block, and Lower Right Block.

**Dodges**: Dodges are Defenses with a green grid icon. If your dodge covers the same areas as an Attack, you may play that dodge to avoid the Attack. You may play green gridded cards even if Disarmed or Unarmed.

**Special Cards**: Events, Situations, Locations, Plots and Objects are all considered Special Cards. You may only play one Special Card per turn, and only during your Defense or Attack Phases.

**Events**: Events have a lightning bolt icon. They may be used to quickly change the course of battle in your favor. Events are removed from play during your next Sweep Phase.

**Situations**: Situations have a silhouette of an Immortal as their icon. They remain in play over many turns, and may change the conditions of the battle.

**Plots**: Plots have a gear icon. They remain in play over many turns, and may be in multiple parts.

**Locations**: Locations have a Greek style ruin icon. Like Situations, they may remain in play and can change the condition of battle over many turns. Locations have a global effect which affects each player equally. Other than specific card effects activated by the player having a location on their side of the board, neither player controls the effects of the location.

**Objects**: Objects are marked with a sword icon, and include such things as extra weapons or armor, with which you may be equipped. Object: Allies are subject to any card/effects that affect Allies or Objects. These cards stay in play over many turns.

**Edge**: Edge Cards are marked with an outstretched Hand icon. They may provide you the advantage you may need to win in battle. Edge Cards are not Special Cards.

**Illusions**: Illusions are cards which can only enter play through a Hard Exertion. Whenever you make a Hard Exertion, you may choose to play 1 Illusion card from that Exertion. This does not count as playing a Special Card. If you make more than one Hard Exertion during your turn, you may play an Illusion card from those Exertions as well. You may make a Hard Exertion during your turn expressly for an

Illusion card if you choose. You may not play an Illusion from your Hand. If an Illusion is drawn into your Hand, it will remain stuck there until you find a way to Discard it. Illusions are not Special Cards and are not subject to Counters that do not specifically counter Illusions. Illusions are swept from play during the Sweep Phase of the player that played it.

**Pre-Game Cards:** These cards typically do not have the standard Highlander logo on the back. These cards are played before the game begins. They do not count toward the total number of cards in your Endurance. You may only use six Pre-Game cards. In addition, you cannot use more than one of any unique Pre-Game card. If using a Quickening, you may not use the Quickening for the persona you are playing. You may use Quickenings from 2ed or 3ed so long as its Persona Power does not involve the gem mechanic. Pre-Game cards are not considered in play, however, their effects are considered in play and can be nullified or ignored with the appropriate card or effect. Pre-Game cards can only be targeted by a card or effect that specifically states that it targets Pre-Game cards.

**Persona Cards**: This Pre-Game card allows you to play as your favorite Persona. Persona cards have a picture of a Persona on the front, and biographical information about that Persona on the back. Below the biographical information, you will find a description of the special skills a Persona brings to 'The Game.' These skills are known as Persona Powers. You may use Persona cards from 2ed so long as their Persona Power does not involve the gem mechanic. You may still play the game without a Persona Card (see Generic Persona). If you play with a Persona, you may only include Persona Specific Cards for that Persona in your Endurance. You may only include Master Cards (see Card Groups) in your Endurance up to the number as indicated on your Persona card.

**Generic Persona**: If you choose to play without a Persona, you are considered a Generic Immortal and may use cards from all of the Persona's. But you may only use one of each Persona Specific Card, and none of their Reserved or Signature Cards. For example, you could use one of Connor's Power Blow cards, and one of Connor's Back Away cards, but you could not use two of Connor's Power Blow or Back Away cards. You cannot include Master Cards (see Card Groups) in your Endurance if you do not use a Persona Card.

**Card Groups**: Any cards that share a single word in their title are considered to be part of a Card Group. For example, the cards Master Swordsman, Weapon Master and Master's Advance all have the word Master in their title and thus are part of the Master Group and are Master Cards. See Group Classifications in the FAQ section.

**Faction Specific and Listings:** Faction specific cards are signatured cards and can only be used by immortals that are part of that faction regardless of any other effect such as allowance cards or persona abilities unless specified explicitly through text to allow usage of faction cards. Faction cards for the purpose of game mechanics during play are considered persona specific cards. At this time there are only three factions, they are Clan Macleod, The Four Horsemen and The Romans.

Clan Macleod - Connor, Duncan, Colin The Four Horsemen - Methos, Silas, Caspian, Kronos, War, Death, Famine, Pestilence The Romans – Marcus Octavius, Marcus Constantine, Brother Paul, Kalas, Cardinal Giovanni, Marcus Korolus

**Weapons of Choice:** This Pre-Game card is the weapon your Persona prefers when engaging in combat. If you are using a Weapon of Choice, you may include the appropriate Weapon Specific cards in your deck. If you do not have the appropriate Weapon of Choice in play, you may not play any Weapon of Choice cards for that weapon unless you have an effect that allows you to do so (example: Weapons Expert).

**Pre-Game Crystals:** These cards allow you to substitute your basic Attacks and Blocks for different Defenses or non-Special Attacks. This substitution is one for one to the limit of Pre-Game Crystals you have. These cards do not count towards your Pre-Game card limit of 6 cards. However, you may only include one of each unique Pre-Game crystal in your deck. You may use and mix Crystals from any edition. (Removed is the text about the version rule, this no longer applies)

Pre-Game Watcher or Hunter: If you wish to include Watcher or Hunter cards in your deck, you must include the appropriate Pre-Game card. You may include either 1 Watcher or 1 Hunter Pre-Game, you cannot use both, and may only have 1 of either in your Pre-Game. Cards or effects which allow you to include cards not normally allowed in your deck cannot be used for Watcher or Hunter cards unless specified. If the Watcher or Hunter Pre-Game is removed from the game, you do not remove the cards from your deck and you may still play the Watcher or Hunter cards normally. You may only play Watcher or Hunter cards if you have/had a Watcher or Hunter pre game card in your pre game, unless you have a card that specifically allows you to do so (Example: Watcher Database).

## **Beginning the Game**

After constructing your deck, you will need a couple of other items: At least one six-sided die, something to keep score, and an opponent with their own Highlander deck to pit against you.

Both players shuffle their Endurance and offer to let their opponent cut. Then, each player places their Endurance to one side in front of them. All Pre-Game cards and cards that you are allowed to begin the game with "in play" are revealed at the same time by both players prior to rolling to see who goes first. Each player then draws one card for each point of his starting Ability (also known as Maximum Ability). Roll a die to determine who goes first. After that, the players then take alternate turns. The first player proceeds through the Sequence of Play, and finishes their turn. The second player then proceeds through the Sequence of Play, and finishes their turn. Player's alternate turns until one player is defeated. During your turn, you must play at least one non-Edge card, or make a Hard Exertion.

When defending Attacks, play from your left to right, playing the cards facing you, so that the grids match up with one another. Your opponent can't read the text, but most Defense cards don't have extraneous text, so it doesn't matter. If he needs to read the card, he can request to see it. The important thing is that he can easily see that the grids on the cards match up.

When playing Attacks, you lay them down in order, from your right to your left, facing your opponent so that the cards are upside down to you. If you are modifying the Attacks with Edges and such, play those between you and the Attack being modified, also upside down. The Attacks and modifiers are played in this manner so that they are clear to your opponent.

When playing Events and/or Edges, please place those facing your opponent so that they can be easily read. Permanent cards like Plots, Situations and Objects can be played facing yourself since they remain in play and usually effect you more than your opponent. Again, since you are the one who played the Event/Edge you have little need to read it, and in the case of permanent cards your opponent can always ask to read them if they need to do so.

# The Sequence of Play

A Golden Rule you must remember is that you ordinarily never do anything during your opponents' turn. Therefore, if your opponent has played a card that instructs you to perform an action, you must wait until the May Do/Must Do Phase to perform these actions. These effects are 'Must Do' and 'May Do' effects which you must take care of before proceeding with your turn. Another thing to keep in mind is that during your turn you must play a Special Card, play an Attack, play a Defense or make a Hard Exertion during your turn. Announce to your opponent what Phase you are entering before you take your first action of that Phase so that your opponent is aware of what Phase you are in.

- 1.) **Sweep Phase:** When you play cards during your turn, they are left in play during your opponent's turn as a reminder of what you played. At the beginning of your next turn, you Discard any cards still in play that normally do not remain in play. Cards waiting to be swept during your next Sweep Phase are considered to be in play. Any card or effect that removes a card from play does so immediately, instead of the card waiting for your next Sweep Phase. Discarding cards to the Discard Pile during this Phase is not considered removing the cards from play.
- 2.) *May Do Must Do Phase*: Due to game mechanics, this Phase is considered the beginning of your turn. You may play/activate/resolve May Dos and Must Dos in any order during this Phase.
- 2a.) May Do Effects These effects can be identified by the Text of their instructions, which will have the word 'may' in the description of the action you may take. You may accomplish these effects in any order you choose. You may opt not to do any 'May Do' effects at all unless specified. You can activate or play May Do actions or effects any time during your turn. If your opponent did not Attack during their last turn, you may Discard one Defense from your Hand during this Phase. During your May Do/Must Do Phase you may put into play 1 unprovoked (Meaning there are no pending attacks coming at you) gridded Guard per turn (this does not count as a card played).
- 2b.) Must Do Effects These effects can be identified by the Text of their instructions, which usually will have the word 'must' in the description of the action you must take. If you have multiple 'Must Do' effects to take care of, you may Handle them in any order you choose, as long as you take care of all of the 'Must Do' effects if possible. If your opponent did not attack during his last turn you may Discard one Defense from your Hand during this Phase. If you have an Edge Card that will counter or affect a 'Must Do' or 'May Do' effect directly, then you may play it when resolving these effects.

3.) **Defense Phase:** The next action you will take on your turn is to play your Defenses. Defenses may only be played during this Phase. If there is no Attack coming, you cannot play a Defense, nor make an Exertion for one, except you may put into play one unprovoked Guard. You may play one

Defense against each Attack that your opponent played in their turn, and cannot knowingly play an inappropriate Defense. If the colored area on your Defense card covers the entire corresponding colored area on your opponents' Attack, the Defense is successful and you normally take no damage from the Attack. You may play a Special Card in this Phase, or wait until your Attack Phase.

- 4.) **Attack Phase:** During this Phase you may normally only play one Attack. If you are prevented from playing an Attack or have lost all of your attack opportunities, then you cannot play an attack, or make a Hard Exertion for one. When preparing to attack, take note of the last resolved Defense you played as it may modify your first attack. You may only attack to an areas that the block does not cover. A successful dodge will defend an attack as well and perhaps affect your next attack, depending on its Game Text, if any. If you haven't played a Special Card yet, you may do so in this Phase. Remember that you may only play one Special Card per turn.
- 5.) **Ability Adjustment Phase:** Cards cannot be played once you start this Phase. If a card lowers your Ability, or you have pending damage, make that adjustment now. If a card raises your Ability, make that adjustment now. A successful Attack normally does 2 damage. You may calculate pending Ability loss and gain, along with pending Damage loss and gain in any order.
- 6.) *Draw/Discard Phase:* You must Discard Down or you may Draw Up during this Phase. At the beginning of this Phase you must resolve (in any order) all effects that occur during the Draw/Discard before Drawing or Discarding cards. You cannot play any cards during this Phase. Then, if you have more cards in your Hand than your Ability, you must Discard down to your Ability unless your Hand size is altered, which is known as your Maximum Hand Size. Your Maximum Hand Size is your Ability plus or minus any modifiers. When Discarding down, these cards are immediately placed in your Discard Pile. If you have fewer cards in your Hand than your Ability, you may draw one card at a time, stopping at any point as long as you do not exceed your Maximum Hand Size. If you forget to draw during this Phase, you will normally have to wait until your next Draw/Discard Phase to draw. After you have completed drawing up and or Discarding cards your turn is over. Regardless, of any effect (card or otherwise), before you draw a card during this Phase, you must calculate how many cards you have the capability of drawing. Then you may draw only up to that many cards. (Also see Maximum Hand Size)

# **Winning The Game**

There are two ways to win the game, they are:

- 1) Successfully execute a Head Shot against your opponent.
- 2) Reduce your opponent's Ability to zero. If your opponent begins their Attack Phase with an ability of zero, they immediately lose the game. If your opponent has to skip their Attack Phase due to an effect in play, if they end their Ability Adjustment Phase with an Ability of zero they would immediately lose the game.

# **Keywords**

These keywords are found in the text of a card and are used to make it easily identifiable as to what type of effect is on the card. (ex. DRAW: Draw one card.)

**ALLOWANCE**- Any effect that gives the option to play or put into play an card you would otherwise not have the ability to play or put into play.

**DISCARD-** Any effect that gives the option to discard or forces the discarding of cards from any source other than an Endurance Pile.

**DRAW**- Any effect that gives the option or forces the drawing of cards from an Endurance Pile.

**CAPTURE**- Any effect that gives the option to capture or forces the capturing of a card. Capturing a card is not removing it from play, due to game mechanics.

**REMOVAL**- Any effect that gives the option to remove or forces the removal of an Ingame or Pregame card from the game.

**TRIGGER**- Any effect that allows the player to either discard or remove from the game a card to gain an effect. Trigger effects are not Discard or Removal effects. Triggering Effects that are triggered by damage must be a minimum of one damage unless specified on the card.

**RETRIEVE**- Any effect that gives the option to retrieve or forces the retrieving of a card(s) from a specified source.

**BURN**- Any effect that gives the option to burn or forces the burning of a card(s) from an Endurance Pile.

**COST**- Any effect that causes a player to have to discard a card to play a card from their Hand. Cost effects are not Discard or Burn effects.

**RESTRICTION** – Any effect that restricts or prevents what cards and/or card types may be played and how they may be played, as well as effects which prevent you from performing an action, are a Restriction effect. Unblockable and/or Undodgeable effects are not Restriction effects. Requirements to perform an action or to play cards are not a Restriction effect.

**REVEAL-** Any effect that allows a player to look at their opponent's Hand, either player's Endurance, or at a Hidden Attack.

# **Other Game Aspects**

**Adjacent:** When a card or effect refers to an Adjacent grid, any grids that share a border or an intersection qualify as being Adjacent. For example, a Thrust and a Lower Right Attack are Adjacent because they share an intersection.

**Allies**: An Ally is any non-Pre Game card that depicts a character from the television series or movies, and has their name only as the title of the card unless specified in the subtext. You may only have 1 of each unique Ally in play at a time. For an Ally to have a gender, it must have a specific name (James Horton, Sharon Collins). Non-gender specific names (Angry Mob, Loyal Clansman) have no gender.

**Allowance Cards**: This is a group term for cards like Darius, Fisticuffs, Queen of the Flock, Benefit of Experience, Watcher Database, Teacher of Many, Power of Illusion, and/or Weapons Expert which allow a player to include cards in their deck when they would normally not be allowed to during deck construction. The cards not normally allowed in the deck can only be used, put into play, or played in conjunction with an appropriate allowance card.

**Attacks:** In the text box of attacks should be a number, or 2 numbers separated by a slash. For instance ATTACK: 2 or ATTACK: 2/4. The first number is the normal damage value for the attack. If there is a number separated by a slash, this means the attack may be made a Power Blow and that is the damage value of the attack if it is made a Power Blow. Basic Attacks do 2 damage normally and 4 damage if made a Power Blow, unless otherwise stated. If no number is printed on the card, the attack does 2 damage unless otherwise stated.

**CAPTURE:** Capture effects happen when you take a card from one location (example: your Hand, Endurance, Discard Pile, etc...) and place it underneath another card (in-game or pregame) face down. Faced down Captured cards have no effect on play. Captured cards cannot be placed in any Endurance or Discard Pile other than then owner's. For example, if you have a Captured card(s) in your Hand or under a card, then decide to activate an effect that would put the Captured card(s) into either your Endurance or Discard Pile, the captured cards are instead placed in the owner's Discard Pile.. A player can look at their Captured cards anytime during their turn. These effects are always prefixed with the CAPTURE Keyword, or has an effect described here.

Note: A card that is modified by another card but has an effect on play is NOT "Captured. Example 1 – Mongolian Broad Sword and Rachel MacLeod are cards that "Capture" other cards. Example 2 – Watchers Tattoo and Kidnap are cards that do NOT "Capture" other cards.

Considered Disarmed/Considered Weapon Broken: If a card or effect states that you are considered to be disarmed or that your weapon is considered to be broken, that state remains only as long as that card or the card stating the effect is in play. If you are "considered disarmed" or your weapon is "considered to be broken", this applies to one weapon, of your choice, that you are using. While under either of these effects, you cannot regain your weapon(s). When the card or effect leaves play or is nullified / ignored, you immediately regain your weapon(s) or your weapon is no longer broken, you do not need to regain your weapon. Being "Considered Disarmed" or "Considered Weapon Broken" is an effect that IS a Restriction effect due to game mechanics. Any Guards or weapon related Standing Defenses are removed from play unless you have a way to play the Standing Defense while Disarmed, Considered Disarmed or Unarmed.

**Considered Prone**: If a card or effect states that you are considered to be Prone, that state remains as long as the card or the card stating the effect is in play. While under this effect, you cannot regain your feet. When this card or effect leaves play or is nullified / ignored, you immediately regain your feet, you do not need attempt to regain your feet.

**Continuous Effect**: These are effects which last over many turns and are sometimes cumulative in nature. Diane Terrin and Jungle are examples of Continuous Effect.

**COST:** Costs are effects that require you to do something prior to playing a card or taking an action. When a Cost requires you to spend a card, it means to Discard that card from your Hand. If it requires you to spend a Hard Exertion, it means that you must make the Hard Exertion. If a Cost makes you make a Hard Exertion to play a card, you may still play that card from your Hand during the same Phase in which you made the Exertion. Paying a cost is not considered being forced to Discard from your Hand or Endurance. These effects are always prefixed with the COST Keyword, or can be found in the compatibility lists later in the rule book.

Example 1- If you have to Discard a card or perform an action to play a card (like Master's Advance or being Prone), you only have to Discard a card to play a card from your Hand. If you exert for a card to play, you do not have to Discard to pay the cost if the text says the action must be performed to play a card from your Hand.

Example 2 - If your opponent is playing with the Short Sword WoC you must Discard a block to play a non-basic block. Since the text does not specify "from your Hand" you would have to Discard a block to play a non-basic block from your Hand or from an exertion.

**Countering Cards**: If a card is countered, it is immediately Discarded, and has no effect on play, but is still considered to have been played.

**Damage vs. Loss of Ability**: If a card or effect forces you to lose Ability, it may not be countered with a card that prevents damage.

# **Defending Multiple Attacks When You Have Multiple Exertions -**

If the defending players can make multiple Hard Exertions for a defense during their Defense Phase, they make choose to Exert for indivigual attacks.

#### **EXAMPLE:**

Player A has played 5 attacks. It is Player B's turn and he is playing as Quentin MacLeod and can make 2 Hard Exertions. Player B plays defense from his Hand against the first, third and fifth attacks. Because Player B has the opportunity to make multiple Hard Exertions, he must announce whether he is going to make ONE Hard Exertion or MULTIPLE Hard Exertions prior to making his first Hard Exertion. If he chooses to make a single Hard Exertion, he may play a defense from that Exertion on any of the eligible attacks. If he chooses to make multiple Hard Exertions, he must state which attack he is defending and may only play a defense from that Exertion on the stated attack. He may then repeat this process on other attacks so long as he has Hard Exertions he can make. He MUST choose the attacks in the order they are played, if making Multiple Exertions. Player B may skip attacks in the sequence (if making multiple Exertions), but cannot go back to them, and when skipped they are considered to be successful

**Diamond Icon :** Whenever a Diamond Icon appears before the title of a card, that means that only one copy of that card may be in play on your side.

**Dirty Tricks**: Dirty Tricks cannot be blocked, do no damage (unless specified), and cannot be Power Blows. You may play Dirty Tricks even if Disarmed or Unarmed.

Disarmed, Unarmed & Breaking Weapons: During the course of the game, you may become Disarmed, or your weapon may be broken. Any card or effect that states that it will "Disarm" your opponent means only one weapon is Disarmed. The person that is being Disarmed chooses which weapon is to be Disarmed. If your weapon is broken, you are Unarmed, unless you are using two or more Weapons of Choice. In this case, all weapons must be Disarmed and/or broken for a player to be Unarmed. If either occurs, you may not play attacks or blocks that require the use of a weapon, but can play attacks that have an effect that allow them to be played (example: Dirty Tricks, Martial Arts, etc...). Any Guards or weapon related Standing Defenses are removed from play unless you have a way to play the Standing Defense while Disarmed, Considered Disarmed or Unarmed. When you first become Disarmed during your turn, you may not roll during your May Do/Must Do phase to regain your weapon until the beginning of your next turn. During your 'May Do' phase, you may roll for a one in six chance (or make a Hard Exertion to increase the chance to three in six) to try to rearm yourself for each weapon Disarmed.

You do not have this chance if your weapon was broken, however there are cards and effects that will allow you to get a new weapon if your weapon is broken or you are Unarmed (Example: Extra Weapon, Weapon Stash, etc...). While Disarmed, you may not play any Weapon Of Choice cards or cards with Blade in the title. Any Weapon Of Choice or Blade cards that pertain to the Disarmed or Unarmed weapon are Discarded from play. You cannot attempt to Disarm or break a player's weapon that is already Disarmed or broken. If you manage to recover a Disarmed or Unarmed weapon and you had more than one Weapon of Choice Disarmed or Unarmed, you may choose which one is recovered. Disarmed or Unarmed is NOT Prevention due to game mechanics.

**DISCARD:** These are effects that either force you to Discard cards from your Hand or allow your opponent to Discard cards from your Hand. These effects are always prefixed with the DISCARD Keyword, or can be found in the compatibility lists later in the rule book.

**Discard Pile:** You or your opponent may search through either players Discard Pile, though if you wish to search your opponents Discard you must ask first. Neither player may shuffle or otherwise change the order of the cards in any Discard Pile. When Sweeping cards or Discarding cards from your Hand, you may place them in any order on the top of your Discard Pile. If your opponent Discards cards from your Hand, he may choose the order in which they are placed on top of your Discard Pile. Discarding from the top of your Endurance and cards Discarded from an Exertion must stay in their original order.

**Draw:** These are effects that allow you to draw cards outside of your Draw/Discard Phase. These effects are always prefixed with the DRAW Keyword, or can be found in the compatibility lists later in the rule book.

**Duplicating A Cards Effects**: If you are duplicating a card's effects, you do not need to meet the requirements for that card to achieve duplication. However, if the card being duplicated has other requirements to achieve its effect, those requirements must be met. If a card being duplicated has any "play in conjunction" cards attached to it, the effects of the "play in conjunction" cards are also duplicated. Any other effects modifying the duplicated card are nullified.

Example 1: Player A plays Police: Remove Situation in conjunction with 3 Excessive Force. Nakano duplicates the Police, and the effects of the Excessive Force since they were played in conjunction with the Police.

Example 2: Player A plays Basset &Hotchkiss (1ed) and Discards 3 Attacks to cause both players 3 Ability loss, Nakano can duplicate the Bassett & Hotchkiss, but must Discard his own Attacks to activate it since the Discarding is not "played in conjunction".

**Edge Cards**: These cards are not Special Cards. You may play as many Edge Cards per turn as you wish. Edge Cards played in conjunction with any card are countered if that card is countered. You may always play Edge cards unless card text specifically says you cannot.

**Endurance Size**: You must begin the game with an Endurance of at least 50.

Events: Event Cards briefly affect battle, and are normally swept during your next Sweep Phase.

**Exertions**: An attempt to draw on inner reserves of strength, through use of ones Endurance, is known as a Hard Exertion. To make a Hard Exertion, reveal the top 5 cards from your Endurance. Any cards that you reveal and do not use are placed into your Discard Pile after the Hard Exertion has been fulfilled. Each Hard Exertion may only be used for one function. You may only Exert in your May Do/Must Do, Defense and Attack Phases. You may only make one Hard Exertion per turn. After you make a Hard Exertion, you may no longer play cards from your Hand during your current Phase. This does not end that Phase, it only ends your ability to play cards from your Hand during that Phase.

For this reason, it is important to remember to play everything you wish to play from your Hand before Exerting. The standard uses for a Hard Exertion include: making a Power Blow, making a Power Block, searching for a Defense, searching for an Attack, Exerting for a card effect, for becoming un-Prone, Exerting for an Illusion, for rearming yourself or Exerting for "nothing". These are known as Standard Hard Exertions. Before you make a Hard Exertion you must always declare what you are Exerting for, and how many cards you will Exert (if there are any effects in play that modify the size of Exertions). These are known as Hard Exertions. If forced to make an Exertion, it is not considered being forced to Discard cards from your Endurance.

- 1.) Power Blows: To make a Power Blow, declare one of your Attacks a Power Blow then make a Hard Exertion during your Attack Phase. When you make an Attack you play a Power Blow it does an additional 2 points of damage. You may only make one Power Blow per turn. If you make a Power Blow, your opponent has the right to make the next Attack they play during their turn Hidden (see Hidden Attacks). If an Attack is already a Power Blow, you cannot make it a Power Blow again by making a Hard Exertion, however, you can modify a Power Blow into a Head Shot. If you have a card that must be played in conjunction with an Attack that is considered a Power Blow, play the card first then make the Attack a Power Blow.
- **2.)** *Power Blocks:* To make a Power Block, declare which of your blocks you are making a Power Block then make a Hard Exertion during your Defense Phase. You can only make a block you play a Power Block against an Attack that is a Power Blow. You may play a block against a Power Blow and not make it a Power Block, but you take 2 damage. If a block is already a Power Block, you cannot make it a Power Block again. If you have a card that must be played in conjunction with a block that is considered a Power Block, play the card first then make the block a Power Block.
- **3.)** Searching for an Attack: There may be times where you do not want to play an Attack from your Hand, are restricted to Exerting for one, or just do not have an Attack in your Hand. You may make a Hard Exertion in hope of finding an Attack that you can legally play. You may play one Attack from the Hard Exertion, then Discard the unused cards. It is possible to make an Attack you play from your Hard Exertion Hidden (see Hidden Attacks). If you have a card that requires an Attack to be played in conjunction with it, play the card first, then Exert for the Attack to play with it. If no card is playable in the Hard Exertion, any cards played "in conjunction" are Discarded without effect.
- **4.) Searching for a Defense**: You may search from within the cards revealed in a Hard Exertion for a Defense. You may play one legal Defense from the Hard Exertion. If you have a card that requires a Defense to be played in conjunction with it, play the card first, then Exert for the Defense to play with it. If no card is playable in the Hard Exertion, any cards played "in

conjunction" are Discarded without effect. You may not Exert for a Defense unless you have an Attack pending against you.

- **5.)** *Exerting for an Illusion:* You may make a Hard Exertion during your turn to search for an Illusion. You may play only 1 Illusion found in the Exertion.
- 6.) Other Exertion Uses: Some cards or effects, like Exerting to "Regain your feet" (see Prone) or Exerting to satisfy a card effect or persona power may require you to make a Hard Exertion.
  7.) Exerting for "Nothing": There may be times where you do not want to play any cards from your Hand, you are unable to play cards from your Hand, or a strategic element calls for a Hard Exertion. This type of Hard Exertion is known as an Exertion for "Nothing" or a "Useless Exertion". If you chose to make a "Useless Exertion" it must be made before the end of your Attack Phase.

**Exhaustion**: When the last card in your Endurance is drawn, Discarded or otherwise taken from your Endurance, you Exhaust. You lose 5 Ability during your next Ability Adjustment Phase. Reshuffle your Endurance and all the cards in your Discard Pile together and continue play. If there are no cards in your Endurance and no cards in your Discard Pile to shuffle together and form a new Endurance pile, you immediately adjust your Ability to zero, and begin your Draw/Discard Phase.

**Foil Weapon Of Choice Cards**: Next to the Hand Icon on the back of Foil Weapon of Choice cards, there is an Attribute Gem with a "+" and a number inside it. These cards are legal for play in Type One Format, the attributes on the back of the card have no effect.

**Guard**: A Guard allows you to block a large grid area, and unlike a normal block or dodge, does not need to be swept during your Sweep Phase. You can leave it in play and block with it again next turn! A Guard is still a block. If you make your Guard a Power Block, it is only a Power Block for that turn. While you have a Guard in play, you cannot attack to the areas covered by the Guard. You must remove your Guard from play in order to play a new Defense, or attack to those areas. Remember, as with other blocks, if you just blocked with your Guard, you may only attack to areas not covered by that Guard. You may drop a guard you have in play at any time during your turn, but still must adhere to attack restrictions if that was the last Defense you defended with during your turn. During your May Do/Must Do Phase you may put into play 1 unprovoked Guard per turn (this does not count as a card played).

**Head Shots**: A Head Shot: Event Card is played in conjunction with an upper attack. That Attack instantly becomes a Power Blow. If your opponent cannot play a successful Defense against the Attack, or avoid it, they lose the game and their head immediately. Your Attack must be able to become a Power Blow to be a Head Shot. There are cards other than the Head Shot: Event that may modify an Attack to become a Head Shot, or Attacks that by Game Text are Head Shots. The same rules pertaining to the Head Shot: Event also applies to these cards. If an effect modifies an attack that was previously a Head Shot so that it is no longer a Head Shot, the attack remains a Power Blow.

Hidden Attacks: If you have the opportunity to play a Hidden Attack, you may play it face down. Your opponent will need to guess which area to defend. After they have played all of their Defenses, reveal the Attack. This is one of the few instances where a player may play an inappropriate Defense. If the Defense is inappropriate, your opponent is allowed to Exert for a better Defense, but may not play a new Defense from his Hand against that Attack. If your opponent does not wish to play a Defense from their Hand against the Hidden Attack, you reveal the Attack, and they may choose to Exert for a Defense. If a Hidden Attack is a Power Blow, the attacker must declare that the Attack is a Power Blow before he ends his Attack Phase. If asked how the Attack is a Power Blow, the attacker may respond with "Card Effect" if text on the card or some other card effect makes it so. If an Attack cannot be blocked and/or dodged by text on the Hidden Attack, the attacker does not have to disclose this information to the defender. However, if the card text allows for a choice (for instance, the Attack may be made unblockable or undodgable), the attacker must disclose which choice is in effect when the Attack is played. Any attack where you choose a grid and/or add a grid cannot be played Hidden.

#### Hidden Attacks - Exerting To Defend

- 1- Declare your intention that you are exerting for a defense against the hidden attack.
- 2- Play any "in conjunction" cards on the table that are intended to amplify the defense found in the exertion. Play or activate any card or effect that will alter the exertion.
- 3- Retrieve the cards for the exertion from whichever source (Hand, Top of Endurance, etc....) and hold them separate.
- 4- The hidden attack is revealed.
- 5- Use the cards in the exertion to determine if you have an appropriate defense for the attack. \*If you have an appropriate defense, you may choose to play it to defend the attack. The other cards from the exertion are placed in the Discard Pile.
- \*If no appropriate defense is found, immediately Discard any "in conjunction" cards you played for the exertion. The cards from the exertion are placed in the Discard Pile.
- 6- Resolve any immediate effects of the successful attack(s) if any.

**Hilts**: These are unique cards that may only be put into play to enhance a weapon of choice. You may only have one hilt in play at a time. You cannot play a hilt to replace a hilt already in play. If for any reason you have 2 hilts in play, one must be Discarded from play unless one of them is an off-Hand hilt. If you become disarmed, any hilt you have in play for the weapon disarmed, is removed from play and placed in your Discard Pile. Your hilt(s) are not Discarded from play if you are "considered disarmed" or have a weapon that is "considered broken".

**How Triggering Works:** The cards with this effect will have text that usually begins with "Discard from the game to ..." or "Discard from play to..." or "Discard to use" or the TRIGGER keyword. You may not use a Trigger effect the turn it is put into play. It becomes eligible to use the Trigger effect after your opponent has played their first card on their next turn. Effects that are triggered by damage must be a minimum of one damage unless otherwise specified.

**Ignoring**: For the purpose of game mechanics, "ignoring" is considered to be nullifying in the singular sense. Ignoring a target nullifies the effect/text of the target for the duration of the ignore effect only for the player doing the ignoring.

Example: Player A has Leo Adkins in play and a hilt in play. Player B plays a 2ed Focus to ignore the Leo Adkins and plays a Misfortune to remove the hilt from play. The text on Leo Adkins cannot activate because the text is nullified for Player B by the ignore effect of Focus during his turn.

**Immediate Effect**: These are effects which must be resolved the moment they are played or activated. Nothing can interrupt the Immediate Effect of a card other than countering the card. Police: Remove Situation or Holy Ground are examples of Immediate Effect.

**Loss**: This means that the player loses the ability to play the first card of the named type on their turn. Loss is not Prevention or a Restriction.

Example: Evade states in the text, "You lose one attack this turn." So this means you lose your ability to play your primary attack this turn.

Losing An Attack: When you lose an attack, it is not prevention or a restriction. Nothing is stopping you from being able to attack, you just lost an attack. The attack lost is your primary or first attack opportunity. Losing an attack effects are cumulative. If you are faced with two or more effects where you lose an attack, the first is obviously your primary attack, the second would affect the first additional attack opportunity you have available, and so on. If you have two effects against you where you lose an attack but only have one attack opportunity, then the effect which would target the second attack opportunity has not target so does not apply.

#### Example:

Player A- is using the Rapier WoC, so has two attack opportunities and plays two attacks.

Player B- defends the attacks, then plays an attack of his/her own.

Player A- plays an Evade (You lose one attack) to defend the attack, and so loses his/her primary attack opportunity. However, can still play the additional attack gained from the Rapier Woc, so plays an attack.

Player B- defends the attack, then plays an attack of his/her own, and plays a card that also has an effect that causes his opponent to lose an attack.

Player A- plays an Evade (You lose one attack) to defend the attack, and so loses his/her primary attack opportunity. However, now since there is another effect in play causing Player A to lose an attack, Player A has lost not only his/her primary attack opportunity, but also the additional attack opportunity gained from the Rapier WoC. In this case, Player A would have to use another effect to gain another attack opportunity or not attack.

**Martial Arts Attacks and Defenses:** These are attacks and defenses that are done physically without the use of a weapon. You may play Martial Arts Attacks and Defenses even if Disarmed, Considered Disarmed or Unarmed. Martial Arts attacks cannot be a Head Shot.

**Multiple Attacks**: Normally, you have only one opportunity to attack per turn. However, you may gain additional attack opportunities through the use of other cards or your Persona Power. For each opportunity you have, you may play one Attack from your Hand, play a card that is played in place of an Attack, or make a Hard Exertion for an Attack. The sequence of your Attacks determines

the order in which your opponent must defend. You may not rearrange the order of Attacks once you have played them. If you Exert for an Attack however, you may insert that Attack anywhere along the sequence. You must either play your primary Attack or forfeit your primary Attack opportunity before playing any additional Attacks.

**Multiple Defenses:** When defending against multiple Attacks, you have a couple of options on how this is settled. The playing of Defense cards and attack resolution happen for each Attack in order of their sequence simultaneously. Defenses must be played in the order of the sequence of the Attacks. The only time this differs is when you declare that you will be Exerting for a Defense for one of the Attacks. In this case, prior to the Exertion you may play any Defenses against the remaining Attacks before you Exert for the Defense of one Attack. If you find in the Hard Exertion a Defense that will defend and can carry over to the remaining Attacks, you have the option of letting that happen so long as you Discard the Defenses you already declared for those remaining Attacks. Be careful with how you do this because even though you have already declared Defenses for the remaining Attacks, if you do not find a Defense in the Hard Exertion, you will be subject to any effects that are triggered by the Attack being successful which can effect the Defenses you already declared for the remaining Attacks. Below are some examples.

#### Example #1- Normal Scenario without Exertion

Player A – plays 3 Attacks (Upper Center Attack/Lower Right Attack/Middle Left Attack)
Player B – plays either one Defense to defend all Attacks or plays a Defense for each Attack or a combination of these two options starting with the Upper Center Attack and continuing one Attack at a time through the sequence.

#### Example #2 Scenario without Exertion that has a triggered effect happening

Player A – plays 3 Attacks (Zachary Blaine Pistol /Upper Right Attack/Middle Right Attack) Player B – declares the Pistol successful (Discards appropriate Defenses from Hand due to the immediate effect of the Pistol being successful), then plays the Defenses for the remaining Attacks in order of sequence and resolving them one at a time beginning with the Upper Right Attack.

#### Example #3 Scenario with an Exertion being made

Player A – plays 3 Attacks (Upper Right Attack/Lower Center Attack/Middle Left Attack) Player B – declares that he will Exert for the Defense against the Upper Right Attack, which allows him to play Defenses for the remaining Attacks prior to the Hard Exertion. The attack resolution still begins with the first Attack and is resolved in order. So with that in mind, he plays a lower left block which should defend against both remaining Attacks. Once this is done, he makes the Exertion to defend against the first Attack. He finds an Evade in the Hard Exertion and applies it to the first Attack as the Defense. Then we go to the resolution of the remaining Attacks. They are both defended against by the lower left block so are declared unsuccessful and Player B has taken no damage from Attacks this turn.

#### Example #4 Scenario with an Exertion and a triggered effect happening

Player A - plays 3 Attacks (Upper Right Attack with Hammer Blow THBS and Master's Head Shot Edge/Kurgan Dirty Trick/Upper Left Attack)

Player B – Declares that he will Exert for the Defense against the Upper Right Attack, which allows him to play Defenses for the remaining Attacks prior to the Hard Exertion. The attack resolution still begins with the first Attack and is resolved in order. So with that in mind, he plays a Guard (lower) with Alertness: Block against the Dirty Trick, and then plays a Guard (upper) against the Upper Left Attack. Once this is done, he makes the Hard Exertion to defend against the first Attack.

The only Defense he finds in the Hard Exertion is an upper center block which he must play in order to not lose his head. He plays the upper center block from the Hard Exertion as his Defense against the Upper Right Attack. The immediate effect of the Hammer Blow activates since the Attack was successfully blocked which removes all Standing Defenses in play. Both Guards are removed from play. Now having no options of defending the remaining Attacks Player B elects to let the upper center block remain in play to also defend the Upper Left Attack. He declares the Dirty Trick successful and is now Prone. He then resolves the Upper Left Attack which is successfully defended by the Upper Center Block.

End Result: Player B is Prone, has 4 Damage pending, but has kept his head this turn.

**Nullifying:** When you Nullify a card or its effects, the card has no effect on any card, player, rule or effect in the game for the duration of the effect.

**Nullifying Or Ignoring Persona Abilities Or Pre-Game Cards:** If your persona ability or pregame cards are nullified or ignored, any part of which affects gem assignments used in deck construction are not affected.

Off-Hand Weapons of Choice: Off Hand Weapons Of Choice have a sideways Hand Icon printed on the back of the card. An Off Hand Weapon of Choice is still a One Handed Weapon of Choice. Off Hand Weapons of Choice are designed to be played with other Weapons of Choice, but can be played singularly. If the text states that it must be played with another Weapon of Choice, then it can be played with a Primary Weapon of Choice or another Off Hand Weapon Of Choice. If the text says that it may be played with another Weapon of Choice, then it may be played with either a Primary Weapon of Choice or another Off Hand Weapon of Choice, or by itself.

**Paying a Cost:** Playing a cost is when you must perform an action to get a result. Paying a cost is not considered being forced to Discard from your Hand or Endurance.

Example 1- If you have to Discard a card or perform an action to play a card (like Master's Advance or being Prone), you only have to Discard a card to play a card from your Hand. If you exert for a card to play, you do not have to Discard to pay the cost if the text says the action must be performed to play a card from your Hand.

Example 2 - If your opponent is playing with the Short Sword WoC you must Discard a block to play a non-basic block. Since the text does not specify "from your Hand" you would have to Discard a block to play a non-basic block from your Hand or from an Exertion.

**Persona Abilities with Deck Construction**: When using a persona that allows more than the 6 of any card, it supersedes the 6 of any unique card rule found in the Deck Construction section. For example, Ramirez can include 12 slashes. You may have 12 of any slash so long as the Slash does not have a restriction number on the card. If it does, you must adhere to the restriction number on the card. This also applies to Anthony Galen, Xavier St. Cloud, as well as any persona with a like ability.

**Play In Place Of An Attack**: When a card states "Play in place of an attack.", the attack it is referring to is the Primary attack only.

**Plots**: Plots that are "put into play" are treated the same as if they were played from your Hand. Any 1ed or Raven cards that have Situation: Plot or Event: Plot in their text are now considered to be just Plot. This does not apply to (Event:Plot?) which is treated as an event.

Sequence Plots: Sequence Plots may have a requirement to be played. Sequence Plots take effect on the game only during the turn that they enter play (and, sometimes, your opponent's next turn). Sequence Plots have a final Plot card that finishes the Plot Sequence, usually having a devestating effect and removing all the prior Plots in the sequence from play. You may only have one of each unique Sequence Plot in play at a time.

Stand-Alone Plots: Stand-Alone Plots are much like Situations or Objects. They act alone and have a permanent effect on the game. You may only have one of each unique Stand-Alone Plot in play at a time.

**Pregame +1 and MCBC Cards:** There are many versions of these cards throughout the three editions. As well as following the version rule, you may only increase your maximum ability during deck construction once by using these types of pre game cards. For example, Connor cannot use a +1 pregame from 1ed with a +1/MCBC from 2ed to begin the game with 17 ability.

Pre Game Cards That Allow You To Include Cards: When a non-Weapon of Choice Pre-Game card states that the persona can include certain cards in their deck they may not normally be able to, they may use these cards normally. This does not apply to cards like Darius, Teacher of Many, Benefit of Experience, etc..., which specifically state that they must be played at the time the card is played or brought into play.

**Pre-Game Crystals:** Crystals do not have to be in a specified order, and do not count against your Pre-Game limit. You must still abide by the 1 unique Pre-Game rule.

Primary Weapons of Choice: Primary Weapons of Choice have a vertical Hand Icon printed on the back of the card. Normally, you may utilize only one Primary Weapon of Choice. It cannot be removed from the game. Any player not using a Weapon of Choice is still considered to be using a one Handed weapon (one Hand Icon) and has a free Hand. Your Weapon of Choice may require one Hand (one Hand Icon) or two Hands (two Hand Icons) to wield. If you are Disarmed, your Weapon of Choice is turned face down and is out of play until you have regained your weapon or have replaced your broken weapon. While Disarmed, you cannot play Weapon Specific Cards relating to that Weapon. If you happen to be using two Weapons of Choice and are Disarmed, you decide which Weapon of Choice is Disarmed.

**Prone**: During the game, you may become Prone. When you first become Prone during your turn, you may not roll during your May Do/Must Do Phase to become un-Prone until the beginning of your next turn. If you are Prone, you must Discard a card from your Hand with the same Icon type as any card you play from your Hand. If you are Prone, during you May Do/Must Do Phase, you have a 1 in 6 chance of 'regaining your feet'. You may increase this chance to 3 in 6 by making a hard exertion before making the roll.

**Putting Attacks In To Play**: Effects that put attack(s) in to play may only be used during your Attack Phase. Because the attack(s) is put in to play, no cards may be played inconjunction with the attack(s). The attack(s) being put in to play must follow any attack restrictions that would apply if the attack(s) were played normally.

Ranged Attacks: Ranged Attacks are Special Attacks and you can never play a block to defend against them unless an effect (example: Shield WoC ability) allows you to do so. You may play Ranged Attacks even if Disarmed or Unarmed. If a card turns a non-Ranged Attack into a Ranged Attack, it loses all other subtypes, card text, and gains the above rules (any cards in conjunction with that Attack that would now be illegal are removed from play).

**Redirecting Damage and Ability Loss:** When a card is played that redirects Damage or Ability loss, that card does not become the cause of Damage or Ability Loss. It is redirecting the Damage or Ability Loss, so cannot be targeted by a redirecting effect. Example:

Player A - Plays Boom Boom against his opponent. (effect causing ability loss)

Player B - Plays Really? (redirects the ability loss to Player A)

Player A - Cannot play a Really? to redirect the ability loss, so losses one ability.

Removing Pre-Game Cards from the Game: If a pre-game card allowing you to add cards to your Endurance is removed, the added card or cards are not removed and may still be played normally. If a Pre-Game card that modifies your attributes during deck construction is disarmed, broken, or removed from the game, you do not remove the cards allowed and may continue to play those cards normally.

**Removal:** Removal effects are any effect that would remove an in-game or pre-game card from the game. These cards either have the keyword REMOVAL: in their text or have the effects described here.

**Retrieve:** These are effects that allow you to search and move a card from one deck location to another (i.e. from Discard Pile to Hand, etc). These effects are always prefixed with the RETRIEVE Keyword, or can be found in the compatibility lists later in the rule book.

**Sheathing and Drawing Weapons:** You normally begin play with all weapons Drawn. You may only Sheath or Draw a weapon if an effect in play allows you to do so. If you have no weapons Drawn, you are Unarmed. If you have hilts and/or Weapon Specific cards in play when a weapon is Sheathed, the affected cards are flipped over and have no effect on play. When the weapon is Drawn, those cards are flipped over and effect play normally.

**Situations & Objects**: Both Situations and Objects remain in play after being played. You may have multiple copies of the same Situation or Object in play at once.

**Special Attacks**: Special Attacks may not be Power Blows, may not be Hidden, and may not be pulled from an Exertion when searching for an attack. If a Special Attack states it can be made a Head Shot, it may only be made a Power Blow as long as it is also a Head Shot. If a Special Attack states it can be made a Power Blow, it may also be made a Head Shot (as long as any requirements on the card are met). Edge cards can be played in conjunction with Special Attacks. If a card turns a non-Special Attack into a Special Attack, it loses all other subtypes and cannot be a Power Blow.

**Stacking Effects**: Identical versions of Objects, Situations, and Locations with continuing effects do not compound their effects, or stack, unless the cards specifically state that they stack or are cumulative. Different cards with similar effects do stack.

**Stand-Alone Plots**: Stand-Alone Plots are much like Situations or Objects. They act alone and have a permanent effect on the game. You may only have one of each unique Stand-Alone Plot in play at a time.

**Cumulative**: Identical versions of Objects, Situations, and Locations with continuing effects do not compound their effects, or stack, unless the cards specifically state that they stack or are Cumulative. Different cards with similar effects do stack. The Cumulative effect is prefixed with the CUMULATIVE Keyword, or can be found in the compatibility lists later in the rule book.

**Standing Defenses:** Standing Defenses are a type of card that remain in play and affect the game until they are removed. These cards state that they are a Standing Defense. You may play non-gridded Standing Defenses during your Defense or Attack Phase even if you have not been attacked. You may drop (Discard) a Standing Defense you have in play at any time during your turn.

**Successful Attacks**: An attack becomes successful if your opponent did not play a Defense or use an effect that will block or avoid the attack. An attack usually becomes successful during the defending players Defense Phase. That player may declare an attack successful before the end of their Defense Phase, instead of waiting for the end of the Defense Phase. Any effects of a successful attack occur the moment the attack becomes successful.

**Trigger:** A card with a Trigger effect must already be in play in order to use. You may use the effect by removing the card from play and placing it in your Discard Pile (or removing it from the game if the card says to do so). You may not use a Trigger effect on a card until it has been in play and your opponent has played at least one non-Edge Card or made a Hard Exertion. You may use Trigger Effects during your opponent's turn. Effects that are triggered by damage must be a minimum of one damage unless specified otherwise by card text. These effects are always prefixed with the TRIGGER Keyword, or can be found in the compatibility lists later in the rule book.

**Wound:** Wounds are Situations that represent ongoing negative effects caused by Attacks. Wounds always have a requirement (i.e. You may only play this card if you played a successful Attack last turn). Unlike other Situations, once the requirements of a Wound are met, they may be put into play and are not considered a Special Card played. You may only put into play one Wound per successful Attack.

# FAQ (FREQUENTLY ASKED QUESTIONS)

**4 Horsemen Premium** - If both players have this card in their Pre-Game, they cancel each other out. Use the normal method of determining which player goes first.

**Dual Type Cards** - When these cards are in your Hand, Discard or Endurance, they are count as both card types. Thier card type is chosen when they are played, and they are then subject only to effects which affect that card type. During deck construction, dual type cards count for each of thier titles. For instance, if you include a Focus/Police in your deck, you would be allowed 5 more cards titled Focus and 5 more cards titled Police. For the purpose of card title, when these cards are in your Hand, Discard or Endurance they count as both titles. When the card is played, its type determines which title is appropriate and that card is now only affected by effects which target that title.

**Silas Persona Ability** - Edge cards count as a card played for the purposes of his ability. (Note: edges do not count as a card played for the requirements of having to either play a card or make an exertion during your turn)

#### **Group Classifications-**

Armor = These cards depict the different pieces of armor that an immortal may use. They are identified by having the word Armor in the title or sub-title of the card. They are divided into three categories reflective of the attack grid, which are Upper/Middle/Lower. You may only have one armor from each category in play at a time. The group classification of Armor applies to these cards as well as any other group classification they apply to. These cards are affected by any card or effect that targets Armor.

UPPER ARMOR CATEGORY
Cavalier Hat
Skull Helmet
Space Goggles
Crusade Helmet
Any card with Upper Armor in the title or sub title

MIDDLE ARMOR CATEGORY
Bone Armor
Crusade Gauntlets
Snake Skinned Jacket
Any card with Middle Armor in the title or sub title

LOWER ARMOR CATEGORY

Any card with Lower Armor in the title or sub title

Bystander = These are cards that depict people who affect the fight knowingly, but anonymously. They are identified by having the word Bystander in the title or sub-title of the card. The group classification of Bystander applies to these cards as well as any other group classification they apply to. These cards are affected by any card or effect that target Bystanders. (Note: If a card has a proper name as a title and is sub-titled Bystander, you may only have one copy of that card in play.)

*Gypsy* = These cards are identified by having the word Gypsy in the title or sub-title of the card. The group classification Gypsy applies to these cards as well as any other group classification they apply to. These cards are affected by any card or effect that target Gypsies. (Note: If a card has a proper name as a title and is sub-titled Gypsy, you may only have one copy of that card in play.)

Hunter - These cards depict people that are known as Hunters. They are identified by having the word Hunter in the title or sub-title of the card. The group classification of Hunter applies to these cards as well as any other group classification they apply to. These cards are affected by any card or effect that target Hunters. (Note: If a card has a proper name as a title and is sub-titled Hunter, you may only have one copy of that card in play.)

Immortal Ally - These cards depict people that are known immortals. They are identified by having the words Immortal Ally in the title or sub-title of the card. The group classification of Immortal Ally applies to these cards as well as any other group classification they apply to. These cards are affected by any card or effect that target Immortal Allies. You may only have 1 of each unique Immortal Ally in play at a time. You may not have an Immortal Ally in play that shares the same name as your Persona or your opponent's Persona.

Lawmen - These cards depict characters that were associated with law enforcement. The group classification of Lawmen applies to these cards as well as any other group classification they apply to. These cards are affected by any card or effect that target Lawmen.

**Detective Walter Bledsoe** 

Any card that has LAWMEN in the subtitle

Member - These cards depict people that are known as members. They are identified by having the word Member in the title or sub-title of the card. The group classification of Member applies to these cards as well as any other group classification they apply to. These cards are affected by any card or effect that target Members. You cannot have more than one of each Member in play and cannot have a Member in play that shares the same name as your Persona or your opponent's Persona.

Mortal Ally = Any card that has a proper name only in the title or has Mortal:Ally in the sub-title. The group classification of Ally applies to these cards as well as any other group classification they apply to. These cards are affected by any card or effect that target Mortal Allies. You may only have 1 of each unique Mortal Ally in play at a time. You may not have a Mortal Ally in play that shares the same name as your Persona or your opponent's Persona.

Pedestrian - These are cards that depict people who affect the fight unknowingly. They are identified by having the word Pedestrian in the title or sub-title of the card. The group classification of Pedestrian applies to these cards as well as any other group classification they apply to. These cards are affected by any card or effect that target Pedestrian. (Note: If a card has a proper name as a title and is sub-titled Pedestrian, you may only have one copy of that card in play.)

Reporter - These cards depict people that are known as reporters. They are identified by having the word Reporter in the title or sub-title of the card. The group classification of Reporter applies to these cards as well as any other group classification they apply to. These cards are affected by any card or effect that target Reporters. (Note: If a card has a proper name as a title and is sub-titled Reporter, you may only have one copy of that card in play.)

Vehicles = These cards depict modes of transportation that may be used by an immortal. You may only have one Vehicle in play at a time. The group classification of Vehicle applies to these cards as well as any other group classification they apply to. These cards are affected by any card or effect that target Vehicles.

Stunt Bike
War Horse
Flying Machine/ Hover Board
Flying Machine/ Wings
Twin Blade Helicopter
Tank
Any card that has Vehicle in the title or sub title

Watcher - These cards depict people that are known as Watchers. They are identified by having the word Watcher in the title or sub-title of the card. The group classification of Watcher applies to these cards as well as any other group classification they apply to. These cards are affected by any card or effect that target Watchers. (Note: If a card has a proper name as a title and is sub-titled Watcher, you may only have one copy of that card in play.)

**Ability** – The only cards that can raise your maximum Ability are ones that specifically state that they do. If a player is at their maximum Ability and a card is played that gains Ability (but does not raise the maximum), no Ability is gained.

Amanda [SE] - Damage from Attacks - Amanda's Attacks do half of the normal damage. When Amanda plays an Attack that says it does 'X' damage, the amount of damage on the card supersedes Amanda's half damage Attacks. Any additional damage is added on to that amount. Example1: Amanda plays a Thrust. A normal Attack does 2 damage. Amanda does 1 damage. Thrust does an additional point of damage if successful, and would do 2 points of damage to her opponent.

**2nd edition Focus/Foiled/Reconnaissance/Always The Last Place You Look -** These cards do not have to have a target to be played.

**Armor and Damage -** No matter how many Armor you have in play, an Attacks damage is only reduced by 1.

**Armory and Rearming -** The Armory: Situation does not cause a player to re-arm if it is played while that player is disarmed. It merely prevents players from being disarmed while it is in play. While The Armory is in play, you may not play cards which may disarm your opponent.

**Arms and Tactics: "Break Glass"** - If your opponent has any cards in play that prevent you from playing a certain type of card, you may use the Arms and Tactics: "Break Glass" to ignore ALL cards and effects that prevent you from playing any types of cards.

**Bait and Switch** - Bait and Switch has prerequisites that must be met in order to play the card. Basic Attacks and Power Blows – If you make an Exertion to make a Basic Attack a Power Blow (not a Head Shot), you cannot answer "card text" if asked the source of the Power Blow, you must state the Exertion was to make the Attack a Power Blow.

**Berkeley Games Distributors** - This card determines your base number of Attacks on your turn. There is no "chance of success" inherent to this roll. Thus, it cannot be modified by Iron Will.

**Bumping** – The only cards that "bump" other cards from play are Locations, unless specified on the card.

**Cards That Are Special Attack/Block:** These cards that are Special Attack/Block are considered both when being targeted by any effect relating to Special Attacks, Attacks, blocks, or Defenses.

Cat And Mouse (Plot) – All Cat And Mouse (Plot) cards allow multiple copies to be in play.

**Chessex - Losing Your Attack Phase** - If you play two Events, there is no way to be able to get an Attack Phase this turn. If you play one Event, and remove Chessex, you still have an Attack Phase.

**Chessex - Darius and Chessex -** Darius is an Event and counts as one of your Events for Chessex. However, you may play an Event and a second Event in conjunction with Darius even though this is now 3 Events, since Darius is played in conjunction with the second Event. This will not allow you to play Darius in conjunction with a Special other than an Event and still play an additional Event.

**Circular Parry -** Circular Parry will only increase the chance of success on cards with the title Disarm.

**Colin MacLeod** – In regards to his Persona Ability, Quickening and persona specific cards, references to Allies should be read "Unique Ally".

**Combination - Hugh Fitzcairn and Kanwulf and Attack Modifiers** - Any damage modifiers on the individual Attacks (i.e. Thrust) still apply to the single Attack formed by Combination.

**Connor MacLeod Alternate Persona –** You cannot have an Ally in play to use his Persona Power, and after you have used his Persona Power you cannot have an Ally in play for the remainder of that turn.

**Considered Versus Actually**: If you are Considered Prone or Considered Disarmed, you are not subject to effects by cards or abilities that are triggered by being Prone or Disarmed. Similarly, if you are no longer under the effect of being Considered Prone or Considered Disarmed, you are not subject to effects by cards or abilities that are triggered by no longer being Prone or Disarmed.

**Continuity - Power Blocks** - Continuity only affects the next 3 Defense cards "played" for the turn the Defense was played.

Corda And Reno (2ed Persona's) - You may only use the persona Ability of the currently active one. You cannot use both of their persona abilities at the same time. You may decide which one to start as after drawing their Hands. You only get two Hand Icons between the two immortals. So they do not each get their own weapon. They are both considered to be using the same weapon. The reason disarming once doesn't disarm both is because they each have their own status for weapon effects. You only "win the game by headshot" if you take the last remaining of the pair's head.

Corda And Reno (2ed Persona's) and the Quality Blade (+1) - If you use Quality Blade (+1 Ability) your active persona will be at +1 Ability. This will enable you to have an extra card in the inactive persona's Hand.

Example: If I start the turn as Corda with 9 Ability, and switch to Reno, Corda never hits an Ability Adjustment or Discard Phase, so he maintains the 9 cards in his Hand, even though his Ability goes back to 8 since he no longer benefits from cards in play. Reno, during his Ability Adjustment Phase, goes up 1 Ability because of Quality Blade, and then may draw up to 9 during the Draw Phase.

Corda And Reno (2ed Persona's) and Card Effects – Cards like their Flying Machines only work for the one that is active. A Watcher: Treatment would only work for the one that is active during the Ability Adjustment Phase. Cards that stay in play would affect the current immortal, who would be affected by all cards and effects "in game".

**Darius: Event - countering** - When Darius: Event is countered, the card that Darius is played in conjunction with is countered.

**Darius: Event - Putting Cards Directly Into Play -** You cannot use a card which puts another card directly into play to bring a card brought into your deck with Darius: Event directly into play.

Example 1: Connor MacLeod plays Conjure, but cannot use it to bring Bowie Knife: Kern into play.

Example 2: Kern has Safe House in play with Alaine: Ceirdwyn underneath it. Kern's opponent plays Police to remove Safe House from play. On his next turn, Alaine comes into play without Darius: Event, a requirement for Alaine to be played. Alaine is Discarded without effect.

**Darius: Pre-Game** - You do not need to include the card whose Restriction number you are increasing. Also, you may only increase the Restriction number on cards that you can "normally" include in your deck. Cards from other Persona's, whether included in your deck through the use of a Quickening, Persona Power, Darius: Event, or some other means, are not "normally" allowed in your deck.

**Defenses That Become Your First Attack -** If you play a defense that states that if it is successful, it becomes your first attack, it does not fill your Attack Opportunity slot. You still have your normally allotted Attack Opportunities, this card only becomes the first attack in a possible sequence of attacks.

Example -

Player A is using the Short Sword (You may only play one attack per turn) - During his Defense Phase he plays a successful Block and Strike as his last defense. That defense now becomes his first attack at the beginning of his Attack Phase. Since he has not played an attack yet, he can still play the one attack allowed by the Short Sword, and it is now the second attack in the sequence.

#### **Desert [1ED]- How Desert Works**

Example 1 – Turn 1 Player A plays Desert from his Hand during his turn. Player B Discards 2 cards at the beginning of his turn. Turn 2 Player A Discards 4 cards at the beginning of his turn (2 cards for each players turn). Player B Discards 4 cards at the beginning of his turn (2 cards for each players turn).

Example 2 – Turn 1 Player A uses a Pre-Game Gathering card to bring Desert into play, and must Discard 2 cards before the end of his May Do/Must Do Phase. Player B plays a Reconnaissance at the beginning of his turn and ignores the effects of Desert. Turn 2 Player A Discards 4 cards at the beginning of his turn (2 cards for each players turn). Player B Discards 4 cards at the beginning of his next turn (2 cards for each players turn).

**Director's Cut: Situation** - Director's Cut: Situation may only be used to fulfill the requirements of another Plot card. It does not duplicate the Plot card, and may not be used with Plots that do not have a requirement, such as Cat and Mouse. Director's Cut: Situation may stand in for additional Plot requirements as long as it is in play. You do not have to identify which requirement Director's Cut is fulfilling until you play a Plot needing a requirement. Director's Cut is NOT a Plot.

**Dirty Trick: Choke - Multiple Chokes** - If you have two successful Dirty Trick: Chokes in play against your opponent, cards from your opponent's Endurance are placed under each Dirty Trick: Choke at the beginning of his turn.

**Dirty Trick: Head Butt -** The player playing Dirty Trick: Head Butt Discards cards for its effect once the Attack is declared successful.

**Dirty Trick: Tackle -** Immediately after playing Dirty Trick: Tackle,roll to see if you are Prone. Your opponent must roll if and when Dirty Trick: Tackle becomes successful against them.

**Duende** - Duende nullifies the Text of the Attack played against you, not any cards that modify the Attack.

**Fast Draw** - If both players play this card, they cancel each other out and the previously determined player goes first.

**Feint: Duncan MacLeod and Guards** - If played with a Guard, that Guard only gains the benefit from Feint for that turn.

**Flamboyant Attack (1ed edge) -** Flamboyant Attack reduces all damage from the Attack it is played in conjunction with when the Attack becomes successful, but Flamboyant Attack has no effect on any Text the Attack may have not pertaining to damage.

Example: A player plays Flamboyant Attack in conjunction with Master Head Shot: Duncan. The Attack is successful. The Attack does no damage, but the player's opponent still loses his head and the game!

**Focus - Nullifying Situations** - Focus nullifies everything on a Situation but its Type and Title. A Situation that is Focused can still be affected cards that affect Situations.

**Focusing Cards that "Hold" (Capture) other cards** - There are some cards that can store or "hold" other cards within them. Typically, the cards being held are placed face-down underneath the card in play that is holding them. If that card is nullified through the use of Focus or other means, the cards remain underneath that card. If that card is removed from play, any cards being "held" are placed in the owner's Discard Pile.

**Forced to Exhaust:** If you are forced to exhaust as the result of a card effect, you shuffle your Discard Pile into your Endurance and lose 5 Ability. Being forced to exhaust is a separate mechanic from being forced to Discard from your Endurance.

**Four Horsemen and Persona Specific cards** - While Four Horsemen is in play, ALL Persona Specific cards, whether or not they belong to the Persona you are playing, are placed underneath Four Horsemen. *Generic Immortal [Substitute Basics]* - When this Persona substitutes a Special Attack/Block for a Basic, it counts only as a Defense during Deck Construction.

**Generic Immortal [Weapon Specifics] and Master's Advantage** - If Master's Advantage: Ramirez is in play, you cannot play more than the normal Restriction number of those cards until you have Exhausted or Reshuffled.

**Generic Immortals [All] and Master cards -** Without a Generic Immortal Persona, any version, you cannot use Master cards in any way. You must have Master Card slots in order to include Master cards in your deck.

**Gladius Pre-Game** – If you make a Power Blow or Power Block, you MUST Discard a card from the top of your Endurance to fulfill the effect of the weapon.

**Guards - Dropping to Attack** - You may drop a Guard at any time to Attack to an area that the Guard covers, but if you used the Guard to Block an Attack that turn you still may not Attack to areas that you just blocked with your last Defense.

**Gypsy Camp - Removing Gypsy Camp from play -** The owner of the Gypsy card decides where it goes if it is removed from play.

**Hand Size -** Your maximum Hand size is normally determined by your Ability score. However, if there is a card or effect altering your Hand size, this holds priority over drawing up to your Ability during the Draw/Discard Phase or Discarding down to your Ability during your Draw/Discard Phase.

Example1: Player A plays a Satellite. Player B now has a Hand size of 14 even with an Ability score of 15. Player B plays 3 cards during his turn. During Player B's Draw/Discard Phase he may only draw up to two cards and end his turn.

**Hard Exertions** – Any 1ed cards with the text "Standard Exertion" now read "Hard Exertion". Hidden Resources - If you reveal a card that prevents your opponent from playing a card, as he is playing that card, the card is already played, and resolves normally. Unless what you revealed is a Discard to use card that can counter his card, which may be used immediately.

**Higher Ground - Multiple Higher Grounds** - If you have multiple Higher Grounds in play, and your opponent has one or more Higher Ground also in play, all Higher Grounds in play are nullified.

**Holy Ground - Playing Unprovoked** - You may play Holy Ground, any version, even if your opponent did not attack you last turn.

**Holy Ground** – All versions of Holy Ground may only be played during the Defense Phase unless stated otherwise on the card. You may not play Holy Ground on consecutive turns.

**Illusions And Darius: Event/Teacher Of Many –** You can include Persona Specific Illusions in your deck using Darius: Event or Teacher Of Many. You must play the Darius or Teacher Of Many from your Hand prior to making an Exertion you wish to use an Illusion from.

**Illusory Terrain -** This card has a continuous effect. Thus, if Focused, when Illusory Terrain returns to play and sees that a Location has been played, the Location is removed.

**Immortal Ally –** You may not play or bring into play any Immortal Ally card if the title is the same as your opponent's Persona Card.

Immortal Research: Methos and "in conjunction" cards - When playing a non-persona specific card from your opponent's Hand using Immortal Research, you may play cards from your own Hand, make an Exertion, or perform any other action in conjunction with that card.

**Improvised Weapon: Objects and Head Shots** - While you have Improvised Weapon: Object in play, you are not only prevented from playing the Head Shot: Event, you also may not make any Attack a Head Shot.

**Impulse - Timing -** When a player plays Impulse, their opponent cannot immediately Discard the target of Impulse to prevent you from taking control of it unless it is a "Discard To Counter" card that counters Impulse.

**Incense of Pain -** When you gain Ability, add the amount of Ability to the number of Incense of Pain: Objects in play, and multiply by 3. That is the number of cards that are Discarded from the top of your Endurance.

**In Conjunction** - If you elect to rip or counter Basset & Hotchkiss (1ed) or Kirk Matunas (1ed or 2ed), or any other card with a "play in conjunction or Discard to boost" Ability in the text, then you do not rip or counter the card until the play in conjunction/Discarding by your opponent is done as that is part of the card action.

**In Conjunction and Cards In Play** – You cannot play an "In Conjunction" card on a card already in play.

**Jacob Kell's Persona Ability Clarification-** Jacob Kell can have no more than five cards under his persona at any time.

**James Horton – Pre-Game (Xavier only use) (TS1- 037)** - Your ally cards are considered Hunters whether they are in your Hand, Discard Pile, Endurance, in play, or removed from the game.

Kanis Hounds – The player Discarding does so when they decide they need to Ignore that effect

**Kanwulf and Master's Advantage** - If he is using the War Axe one-Handed, and Masters Advantage: Ramirez affects him, he will need to either wield it two-Handed, or Disarm it in favor of a second Weapon of Choice. Using the War Axe one-Handed does not make it a one-Handed weapon, although it will be considered to have only 1 Hand Icon in play.

**Kanwulf and Persona Power -** Kanwulf may use a single aspect of his Persona Power several times within the limits of his Persona text.

Katana Guard - If you play a guard with the Katana guard, the other guards text is nullified.

**Katana Sword and Hand Icons -** You cannot play any cards that would make you have more than

two Hand Icons in play, and in Katana Sword's case, you cannot make it a two-Handed weapon if you already have two Hand Icons in play.

**Kern's Persona Ability Clarification (2ed)-** If you play a Special Card during your turn, you cannot Exert for an Attack during that turn.

**Kirk Matunas** - Countering - All Kirk Matunas' played together are considered to be one source of damage. If the damage from Kirk Matunas is countered, all damage is countered.

**Kurgan Persona Power -** If it says 0 damage, the persona power applies. If it says NO damage, the persona power does not.

**Kurgan With Custom Broadsword -** The card does not give you permission to make extra Exertions. It assumes you are using the Two Handed Broadsword (since you have to be) and allows you to use the second Exertion you can make per turn modify a Power Blow you make.

**Maniacal Laugh [Must Attack] - No Attacks** - If you have no Attacks in your Hand, you must Exert for one. If you are prevented from attacking, you need not Exert, but will still lose a Defense.

Master's Attack: Richie and duplicating Attacks - When duplicating an opponent's Attack, Master's Attack: Richie takes on all characteristics of that Attack once it is played, including whether or not it is a Special Attack. Richie may still play Master's Attack from an Exertion to duplicate a Special Attack because it does not become a Special Attack until after it is played. If Richie is duplicating a Hidden Attack from one of several Hidden Attacks that his opponent has played, he should write down on a piece of paper which Attack is being duplicated as he plays Master's Attack.

Master's Disarm: Fasil and Disarm cards - You can play any cards with "Disarm" in the title to work with Master's Disarm: Fasil Master's Disarm (Nakano or Connor) and Forged Steel - If you have Forged Steel in play and you play Master Disarm for Nakano or Connor, you take your opponent's weapon and break it. His weapon is now broken and only you may roll to recover your weapon.

Master's Advantage and Persona's that Increase Restriction Numbers - If a Persona that is allowed more than the Restricted number of a card and his deck is targeted by Master's Advantage: Ramirez, he may only play that card if there are LESS than the total Restriction number normally allowed to that card that he has in play or in his Discard Pile.

Example: Xavier has included 12 Unholy Alliance Plot cards in his deck. He has 4 Unholy Alliance in his Discard Pile and 2 Unholy Alliance in play. His opponent has Master's Advantage in play. He may not play any additional Unholy Alliance Plots until he reshuffles his Discard Pile into his Endurance or removes, nullifies, or ignores Master's Advantage.

**Master's Stance** - When Master's Stance is used to make a Block a Guard, any Text on the Block has no effect unless that Defense was used to block an Attack that turn.

Master's Advantage and Persona Specific or Master Cards - Master's Advantage: Ramirez removes all Text on your opponent's Persona, but does not remove their Title, or Persona name. Therefore, your opponent may play Persona Specific cards normally allowed them, when you have Masters Advantage in play. They may also play their persona specific Master cards since the Master card limit is used only in deck construction.

**Masters Cannot Be Countered Premium** - All 2ed MCBC/+1 are no longer bugged, regardless of what is on the card. You may play one version (1ed or 2ed) in your Type One deck.

Master's Disarm Iman Fasil - This IS an Attribute Check, not an Attribute Challenge

**Mirror Image (1ed)** - Multiple Mirror Images - If you have two Mirror Images in play, both Mirror Image cards stay out. However, your opponent only has to roll against the most recently played card. A miss would still be counted against all Mirror Image cards in play.

**Misprints -** These are cards that were misprinted due to a number of reasons in the past that have not already been addressed.

## Illegal cards -

Iman +1 front/ Highlander back

Any home brewed cards (example= Generic Attitude is Everything/ Disgruntled Employee/both versions of Donna Lettow)

#### Legal combining cards:

You may use the following combination of cards with clear sleeves and placed back to front or vice versa in order to allow the card to be what was meant to exist.

Kane Persona front/Yung Dol Kim persona back = Kane persona Yung Dol Kim persona front/ Kane persona back = YDK persona Kane +1 front/ Kane +1 back = Kane +1
Corda and Reno +1 front/ Corda and Reno +1 back = C&R +1
Iman MCBC front/ Iman MCBC back = Iman MCBC
Master's Prize front/ Master's Prize back = Master's Prize
Methos Inner Strength front/ Opaque sleeve = Methos I.S.
Crystal Front (HS2 P) with HS2-190 Back
Darius Front (HS2 P) with HS2-191 Back
Arms and Tactics (Holding Hands) with HS2-189 Back
Crystal Front (HS2 P) with HS2-190 Back
Darius Front (HS2 P) with HS2-191 Back
Arms and Tactics (Holding Hands) with HS2-188 Back

Arms and Tactics (Hand Holding Knight) with HS2-189 Back

Search For Vengeance Pre-Game misprints can be made usable by using their proper front and backs. This applies to Kyala, Marcus Octavius, Gladius and Kanzashi

**Nefertiri (1ed) and Interrupting Effects** - She may draw to her Ability at any time during her turn, as long as it does not interrupt an immediate effect.

**Nexus and Drawing Cards** - The drawing of cards in your Draw/Discard Phase is an immediate effect. You cannot Discard Nexus to reshuffle while Drawing, and then continue drawing after reshuffling.

**Parrying Blade: Weapon of Choice with a "generic" weapon** - Even though you are assumed to have a one Handed weapon if you do not play with a Weapon of Choice, this "generic" weapon is not itself a Weapon of Choice. Therefore, you can not choose to use a Parrying Blade: Weapon of Choice by itself.

**Paul Kinman or Sabre and Exerting for Defenses** - This effect only kicks in if you play an unsuccessful Defense.

**Pearl Earring -** Pearl Earring can take control of a signature card.

**Pedestrian (Game Ends in 5 Turns) -** At the end of the fifth turn that Pedestrian is in play, the player with the highest Ability wins the game. If both players have the same Ability, the game continues in Endgame.

#### Persona Powers and Quickenings that only happen once per turn -

Mako - During Your MD/MD Phase, you may Discard a Special Card to draw a card. Gallen - You may play an additional Attack each turn if that Attack is a Dirty Trick. (Note: This doesn't restrict him to only one additional Attack per turn)

Marcus - During your MD/MD Phase, you may draw a card for each Object: Ally you have in play. Annie (2ed)- You may play an additional Attack during your turn. (Note: This doesn't restrict her to only one additional Attack per turn)

Corda - During your MD/MD Phase, you may draw a card.

Methos – During your May Do/Must Do Phase, you may Discard up to two cards to draw a card for each card Discarded in this way.

Garrick – During your May Do/Must Do Phase, you may put one illusion from your Hand on top of your Endurance.

**Plots -** You may only have one of each plot in play at a time, unless text specifically allows you to have multiples. When a two or three card plot is completed the effect is immediately resolved. It is considered an immediate effect and possibly a continuous effect depending on the text regardless of the cards being removed from play.

**Quickening (The Flock)** – This quickening is intended for use during the game and not during deck construction. That is what the Pre-Game Amergan is used for.

**Ranged Attacks That Have Hand Icons** - Whether printed on the card or not, these cards are the only ranged Attacks with Hand Icons.

All cards titled Pistol

Thrown Dagger (Kronos)

Improvised Weapon (Baseball Picture)

Thrown Dagger (Grayson)

Berreta Special (Nick Wolf)

9MM (1ed) (Paul Kinman)

Gas Cannister (Xavier)

Musket (Kern)

Shooting Blade (Slan Quince)

**Really?** – If Really? Is removed from play while redirecting damage, neither player takes the impending damage.

**EXAMPLE:** 

Player A – Plays Rush

Player B - Plays Really?

Player A – Sweeps Rush from play during Sweep Phase. Plays Versus (Raphael vs. Reggie) on Player B's Really? removing it from play. Since Really? And Rush have been removed from play, the impending damage from the Rush now has no target and no one takes the damage.

#### **Reveal Effect For Cards Not Present -**

If the player controlling the Reveal effect names a card that is not present after going through the target source cards once, the effect ends.

**Richie Ryan and Darius -** If Richie Ryan uses Darius: Event to use a card he is already using due to his Persona Power, he may only play 1 of that card without Darius each time through his Deck. Once Richie Exhausts or uses another card or effect to shuffle his Discard Pile into his Endurance. If one of the cards is removed from play, Richie may choose to assume that the card removed was the card brought in by Darius.

**Richie Ryan and Quickening: [Bob]** - If using the Quickening: [Bob], Richie Ryan may use one non-Reserved card, and one non-signature immortal specific card, from each Persona.

**Sabre (2ed) and Saber (1ed) -** These cards (Pre-Game and weapon specific) can be intermixed. Sabre and Exerting for Defenses - This effect only kicks in if you play an unsuccessful Defense.

**Safe House** - Playing Cards From - When Safe House leaves play, you may be allowed to play multiple Event and Situation Allies, as long as they were under Safe House. You choose the order they come into play, but you must obey any Text that requires them to be played in distinct Phases. If the Ally has requirements that must be met in order to be played, those requirements must be met or the Ally is Discarded without effect. Any Darius from Safe House may be used to play an Ally you included with Darius in your deck, from your Hand. Any Ally that require Darius to be played with them cannot be played without Darius.

**Selective Memory** - If you avoid Discarding cards with this card, it does not prevent any effects which occur if you do not Discard cards.

**Sheathe Weapon** - If your opponent Disarms themselves by playing Discard Weapon in conjunction with Sheathe Weapon and then Disarms you by "taking" your weapon, you may still roll to recover your weapon. Even though real-world logic dictates that your opponent has both his and your weapons, there are no cards or effects in play that prevent you from re-arming yourself. Similarly, if a Discard Weapon (Object) is removed from play, that player may still roll to recover their weapon. Remember: it's not real-life; it's just a game!

**Superior Tactics -** When played in conjunction with a Back Away or other Dodge, it is treated as having no text, allowing you to avoid Ranged Attacks as well as attack as normal.

**Taking What Is Mine** – If multiple defenses are played in conjunction to form one defense, then all cards with those titles must be Discarded.

The Flock and Members - Flock Members are Unique, you may only have one of each in play.

**The Prize -** When you use The Prize, you draw up to the Hand Size you were at when you used The Prize.

#### The Ring -

For the purposes of The Ring, add up the ASTER stats on the back of the persona card. If they equal 15, then use the gem stat as printed. If they equal 75, then divide the gem stat by 3, rounding down.

**They Also Serve: (HS3-180)** - Unless your opponent ignores/nullifies/removes They Also Serve from play, they may not have more than one Sit/Obj/Plot/Loc in play, and may not play one to switch out the one they do have in play. The text is the way it is due to the fact that people will ignore/nullify this card, and what happens when the effects become active again.

**The Shield (2ed)** – If you are using the The Shield you may still attack even if it is your only weapon.

**Throw: War Axe -** The Weapon Specific card Throw: War Axe only affects Attacks and Blocks that you make on your next turn, and does not have any affect any additional Attacks that you make on the turn you play Throw.

**Weapon Expert -** This card must be played in conjunction with the Attack/Defense it was put into your deck to use with, much like Darius: Event or Teacher Of Many.

**Yung Dol Kim And The Master Of The Short Sword** - YDK may play an Attack as a block from an Exertion. If you have Master of the Short Sword in play, you could play a basic block as an Attack from an Exertion.

#### Card Errata

#### Alert Block (PO4-022) - Parrying Blade Block - 2 -

Choose one area on the Attack Grid for this block to cover. You may play this in conjunction with another non-Standing Defense block. This defense can defend attacks that cannot be blocked. Nullify any Restriction Effects your opponent has in play which would prevent you from playing this block from your Hand.

#### Alertness (4H-030) (HSFV-059) (HS4-024 DvK)- Generic - Event - 2 -

Play in conjunction with a dodge. That dodge can defend attacks that cannot be dodged. You may ignore any effect in play by your opponent which would prevent or restrict you from playing that dodge. You may ignore any effect in play by your opponent which would prevent that dodge from defending multiple attacks. You may ignore any cost required to play that dodge.

#### Alertness (4H-027) (HSFV-055)- Generic - Event - 2 -

Play in conjunction with a block. That block can defend attacks that cannot be blocked. You may ignore any effect in play by your opponent which would prevent or restrict you from playing that block. You may ignore any effect in play by your opponent which would prevent that block from defending multiple attacks. You may ignore any cost required to play that block.

- -DISCARD: Discard a card from under your Crysta Persona to make one defense you play this turn able to defend an unblockable or undodgeable attack(s).

### Treachery [4H] - Event - R3 -

During your turn, instead of making a HARD Exertion for a Power Blow or a Power Block, make a 0 card HARD Exertion and Discard the top 5 cards from your opponent's Endurance.

### Trench Coat (HN13-068) - Object -

Trigger: Discard this card from play to remove one Pedestrian, Bystander, or Reporter from play; or to counter one Pedestrian, Bystander, or Reporter as it is played or put into play.

### Trip (HTG-246) - Corda and Reno - Event (no longer bugged) -

Remove all standing Defenses your opponent has in play. If playing with both Corda and Reno Persona's, you may switch Hands.

### Trip (HTG-165) - Yung Dol Kim – Event - (Signatured) –

Remove all Standing Defenses your opponent has in play. You may play another Special Card this turn. You may only play one Trip per turn.

# TSC Headquarters (HTG-214) – Location – (RETURN TO ORIGINAL WORDING)

No locations may be put into play.

### TSC Troopers (HTG-215) - Situation: Pedestrian –

Play on an opponent's Situation in play. Keep TSC Troopers with that Situation. You may ignore the effects of that Situation

### Two-Handed Stance (SFV) - Katana - Situation - One Hand Icon -

If you play at least one Attack during your turn, your opponent cannot play more Attacks than you did during their next turn. This is a Standing Defense.

# Unlimited Resources - R2 - Grayson - Edge -

Play in conjunction with a Risk Management situation. You may play an additional Risk Management this turn.

### **Upper Center Block – (RVR050)**

Should be RVR050, not BVK011

### Vengeance - Colin MacLeod - R4 - Event -

You may only play this card if your opponent removed one of your allies from play during their last turn. Play in conjunction with a non-Special Attack. That Attack cannot be blocked or dodged. **Watcher [SE]** – Situation –

You may Discard this card from play to counter a Watcher or Hunter card.

### Watcher (HN13-221) - Situation - 2 -

Your cards cannot be nullified during your turn by your opponent.

# Waiting to Strike (4H-123) - Edge - 2 - ( ) -

Play in conjunction with a special card. You may play an additional Event this turn. You may only play or put into play two Special cards this turn. Skip your Attack Phase.

### Weapon Lock- Single Handed Broadsword- Edge- R4 -

Play in conjunction with a block. Retrieve up to three Basic Attacks from your Discard Pile and put them into your Hand. You may not play any Attacks this turn.

#### Woman Scorned - Kristin Gilles - Event - R2 -

You may only play this card if your opponent played an attack last turn. Play in place of an attack. You may play up to three basic attacks from your Hand this turn. Defenses will not block or avoid multiple attacks you play this turn.

### **Tournament Rules**

Official Tournaments follow the above rules, in addition to the following. Large events such as Regional and World Championships are held in Double Elimination format. Tournaments will be timed, usually 30 minute rounds, but this can be randomized to prevent players keeping an eye on time. When the time limit expires, any games still being played enter into End Game. End Game helps to expedite the remaining matches to end in a timely manner. When time is called, the current player finished their turn as normal, and then End Game begins. During End Game, play resumes as normal, but no Healing is allowed. In addition, each player loses 2 Ability during their Ability Adjustment Phase. The following styles are currently sanctioned for Type One play: Sealed Deck, Standard Constructed, 2 Headed Giant and Lean & Mean.

Special Note: A player may concede a match before the resolution of a Head Shot (before an Exertion for a Defense) provided that his opponent accepts the concession. Any agreements between players regarding the concession are strictly between players and have no effect on tournament standings after the concession is made. If a player is playing with any Quickening Pre-Game cards and loses a match to a successful Head Shot, he must forfeit all Quickenings he has in play to his opponent. Only in the case of a successful Head Shot must a player forfeit his Quickenings.

Sealed Deck – This is done in so-called "Pack Rat" style, which is where each person buys 1 starter and 2 booster packs. When everyone is ready, they can open their starter and have a few minutes to look it over. Then, everyone opens 1 of their boosters and chooses 1 card. Once everyone has chosen, they pass their remaining booster cards to their left. This continues until the pack is gone. Then the next is opened and this repeats but to the right side. When all cards have been chosen, each player then assembles their deck. You have to use every card, regardless of restriction, persona, weapon or signature status. You may also have more than 6 of any card. The only exception being multiple persona cards or multiple Weapon Of Choice Pre-Game cards. You may choose which of these you wish to play. Any blank or card list cards count as "Master Swordsman" cards. Each player starts with only 10 Ability.

**Standard Constructed** – This follows the standard rules for deck construction. All cards are legal except for the following – Face Of Death, The Eyes Have It (plot), Zeist, The Curse (InGame), the misprinted Duncan +1 Premium (Duncan Collection) and the Duncan Quickening (Duncan Collection), Season Six (1ed / Event:Plot?), Quickening (HTGQ-036), Highlander the Video Game, Golden Turkey, There Can Be Only One (HTVG-002)

#### 2 Headed Giant Format:

This format is not for the faint of heart, but is addictively fun. You may choose one male immortal and one female immortal. Pregame limit is still 6, and each persona does count as one pre-game. Game play is the same as any other format with a few differences.

- 1) In order for a player to be declared as winning by a head shot, the player must take both of his opponent's heads. When a player loses their first head, they choose which immortal goes away. Any of that immortal's cards you have in play are Discarded and you may not play any of those cards unless you have an effect allowing you to do so (Example: Teacher of Many). Also, you take the amount of damage pending from the Power Blow.
- 2) No generic allowance cards are allowed during deck construction. You may use persona specific allowance cards as normal.
- 3) Corda and Reno can be played as individual personas but not together.
- 4) No Quickenings are allowed.

**Lean & Mean** – This format is the same as Standard Constructed, except you MUST include 6 Lean & Mean cards in your deck and your deck must be the minimum deck size.

#### Plot/Hilt Format-

Deck Building Requirements:

- 1- Each player begins the game with thier non-faction persona specific primary WoC signatured hilt and non-faction persona specific stand alone signatured plot in play. Gem count for these cards does not apply to deck construction. These two cards cannot be removed from play or the game, but may be nullified or ignored by either player. Also, these two cards cannot be taken control of by your opponent.
- 2- There are some immortals that have more than one persona specific signatured hilt and/or plot to choose from. In this case the player decides which they will begin the game with, but may only choose one hilt and one plot. In turn, there are some immortals that only have either a persona specific signatured hilt or plot or none at all. In this case the player begins with only one bonus card or no bonus cards.

- 3- Each player must use the primary WoC pregame unique to thier immortal which matches thier hilt. If the immortal does not have a persona specific hilt, then they do not play with a WoC.
- 4- Each player may only use one WoC.
- 5- If a player is disarmed, considered disarmed, unarmed, or has thier weapon broken, the hilt is nullified, but not removed.
- 6- The Four Horsemen pregame card is not allowed.

# **Highlander Tournament Rules of Conduct**

This is a tool available and encouraged to be used by players, as well as the tournament directors to make the tournament more enjoyable by all attending.

- 1- Be courteous among fellow players and spectators. We are here to play a game, and show that it is a fun game to play.
- 2- Have a respectful attitude to your opponent. Cutting your opponent's deck does not mean reshuffling the deck, nor does it allow you to view any of your opponent's cards. The cutting of the deck should take place with the deck face down.
- 3- No coaching during a match. If either of the two players has a problem, they are to consult the Tournament Director only.
- 4- No scouting during a match. This is disrespectful to all in attendance. Players not in a match at the time should leave the playing area. Players that are eliminated from the tournament need to ask the Tournament Director if they can watch. The final round(s) of any tournament may be watched by all eliminated players. If you are watching a match, you are not allowed to talk or make obvious physical gestures or sounds while watching the match.
- 5- No stalling during a match. If you feel your opponent is stalling, you must consult the Tournament Director only. Then the Tournament director can deem if action is necessary.
- 6- If you have a question about a particular rule, clarification, or errata, ask the tournament director. Do not disturb other player's for answers, since they are busy with their performance in the tournament.
- 7- If for some reason you think that your opponent's deck is illegal in construction, immediately consult the tournament director. He will address the situation quickly and fairly. Regardless of how simple a mistake is made, an illegal deck can cost you the tournament. If you are in doubt whether your deck is legally constructed, consult the tournament director prior to the event so he can confirm its validity.
- 8- Treat other player's the way you would like to be treated. Everyone has off days or days that your deck design doesn't work. Take this in stride and restrain from becoming hateful and derogatory against the other players or the tournament director.
- 9- The tournament director is the authoritative figure at a tournament. Regardless of how anyone or any group might play the game in their area (which includes any house rules specific to any group), they must defer to the manner in which the tournament director has elected to Handle the event. If you are playing in a new area and not aware of any possible house rules, consult the tournament director prior to the tournament to clear any misunderstandings prior to the tournament.

- 10- The tournament director has the final say on any point in judgment whether it is something not covered in the rules, or a player versus player issue. If any player abuses either the game rules or the rules of conduct, the tournament director has every right to disqualify the person and remove them from the tournament. Do not argue with the tournament director because you do not like how they ruled a situation; consult them after the tournament, not during it.
- 11- The playing of Quickenings is an individual decision for each player. If you do not want to lose Quickenings, then don't play with them. Do not be upset if you play them and lose your head. Quickenings are designed to be taken by your opponent if they take your head. If you do lose your head and are playing with Quickenings, the first thing you should do is Hand the Quickenings over to your opponent. Do not get up and walk away. It is your opponent's choice on whether he elects to take the Quickenings or not.
- 12- Have fun, take this time to learn new strategies, and meet new people. However, the most important thing of all is "Don't lose your head", it is after all, a card game.
